Do.	In REPEAT. Men may enter the cage or other conveyance.

16. The manager, or a competent person or persons appointed by the manager, shall, once at least in every twenty-four hours, examine the state of the external parts of the machinery, and of the head-gears, ropes, chains, cages, guides and connections in the shaft and other similar appliances which are in actual use, both underground and above ground, and, if more than 20 persons are employed on the same simultaneously, shall without delay write or cause to be written in a proper book a full and accurate report of the result of such examination. [Regulation 24.]

18. Every windlass, winch or whip in use at a shaft or mine shall be provided with a stopper, break peg or other reliable holder. [Regulation 26.]

19. The bucket, skip or any wagon in the cage shall not be filled up to such a height that any of the contents can fall out, and the bottom of the cage shall be kept clear. [Regulation 28.]

20. When tools, wood, etc., with ends projecting over the top of the cage, skip or bucket are being lowered or hoisted, the projecting ends shall be securely fastened to the rope or bow. [Regulation 21.]

22. At the top of every incline on which the haulage, not being surface rope or endless chain haulage, is worked by mechanical power or gravity, there shall be stop-blocks or other similar contrivances to prevent wagons from running away. Additional stop-blocks at runaway switches, or some other appliances for arresting or diverting the descent of wagons in the event of a runaway, shall be fixed below the first stop-blocks at a greater distance than the length of a train of wagons. There shall also be provided and attached behind the ascending wagon or train of wagons a back-say, drag or other suitable contrivance for preventing the wagon or wagons from running back. [Regulation 33.]

MORE WORKMEN.

23. In open workings the sides shall be properly sloped, stepped, or secured and trued, overhauled and all loose ground and material, shall be removed from the edge, or otherwise secured, in order to prevent danger to persons employed in the mine. [Regulations 38, 39 and 40.]

24. The roof and sides of all travelling roads and working places shall be made safe and kept secure. [Regulation 41.]

If more than 20 persons are employed in the mine, simultaneously, a written report of such inspection shall be made without delay in a book kept at the mine for the purpose. [Regulation 43.]

No person shall be appointed to carry out the foregoing inspection unless he has attained the age of 21 years and has had sufficient practical experience of the working of mines. [Regulation 21 (4).]

27. Every place where work is carried on or where men are stationed or pass shall be placed under the charge of a competent person appointed by the manager or underground manager. [Regulation 44.]

29. The top and all openings between the top and bottom of shafts, winzes, shafts or sinking holes and any openings into a shaft more than

10 feet deep below a drive and other dangerous springs, shall be provided with a permanent or portable ladder in order to protect persons or things from falling into them. When a shaft, winch, rim or steps leads directly into a travelling road or place where persons are stationed at work, the ladder at such points shall be protected against danger from anything falling from above.

[Regulation 46.]

20. At every shaft station where it is necessary for persons to pass from one side of the shaft to the other, protection shall be made enabling them to do so without entering or causing a winding compartment.

[Regulation 49.]

33. The ventilation in every mine shall be sufficient to blow away smoke and dusts and render the atmosphere safe and sound, so that shafts and workings of the mine shall be as fit as for working or passing.

[Regulation 50.]

34. After underground workings, shafts, ramps or winches have been in use for some time, a thorough examination shall be made before workmen are engaged.

[Regulation 51.]

35. In ladder-shafts making an angle of 25 degrees or less with the vertical, platforms shall be provided at intervals not exceeding 50 feet and the ladders shall be placed so as to leave the openings in the platforms. Ladders shall be fixed at an inclination of not less than one foot horizontal to every 10 feet vertical.

[Regulation 52.]

36. In ladder-shafts where the slope is less than 25 degrees and more than 30 degrees with the horizontal, platforms shall be placed at intervals of not more than 50 feet along the underlie or slope of the shaft.

[Regulation 53.]
